

LOGANATHAN S

AI & Data Science Undergraduate | Web Developer | Machine Learning & IoT Enthusiast
Salem, Tamil Nadu • 8838676284 • logan970105@gmail.com • linkedin.com/in/loganathan-data

SUMMARY

AI and Data Science undergraduate (CGPA 8.50) with hands-on experience building IoT-integrated machine learning applications and interactive web applications, including a real-time traffic signal automation system, a healthcare monitoring platform, and a browser-based drawing and animation tool deployed live on GitHub Pages. Proficient in Python, SQL, machine learning, and data analytics, with practical front-end development skills in HTML, CSS, and JavaScript. Fast learner passionate about applying data-driven and web-based solutions to real-world problems, seeking to contribute to and grow within an AI/ML or Web Development engineering team.

TECHNICAL SKILLS

Programming Languages: Java, Python, SQL, JavaScript

Web Development: HTML, CSS, JavaScript, Responsive Web Design, GitHub Pages

AI & Machine Learning: Machine Learning, Deep Learning, Computer Vision

Data Analytics: Pandas, NumPy, Matplotlib, SQL

Tools & Platforms: Git, GitHub (Version Control & Deployment), VS Code

Other: Prompt Engineering

PROJECTS

Doodle Alive — Interactive Web-Based Drawing & Animation App | [Live on GitHub Pages](#)

- Designed and built a fully browser-based drawing and animation application using HTML, CSS, and JavaScript, enabling users to create and interact with doodles in real time.
- Built responsive, cross-browser UI components and interactive canvas-based drawing tools to deliver a smooth, intuitive user experience with no external frameworks.
- Deployed and hosted the application on GitHub Pages, managing version control, iterative development, and release history through Git and GitHub.

Technologies: HTML, CSS, JavaScript, Git, GitHub, GitHub Pages

Real-Time Traffic Signal Automation using IoT and ML

- Engineered an IoT-based traffic signal automation system using ESP32/Arduino sensors to collect live vehicular data and reduce urban congestion.
- Implemented machine learning logic to dynamically optimize signal timing based on real-time traffic density, cutting average vehicle waiting time.

Technologies: ESP32, Arduino, Python, IoT Sensors, Machine Learning

AI-Enabled Healthcare Monitoring System

- Developed a Flutter-based mobile application integrated with ESP32 and IoT sensors to deliver scheduled medicine reminders for at-home patients.
- Built an automated SMS notification pipeline to alert patients and caregivers at medication times, improving treatment adherence.

Technologies: Flutter, Dart, ESP32, IoT Sensors, SMS Notification API

EDUCATION

Mahendra Engineering College, Namakkal, Tamil Nadu

B.Tech, Artificial Intelligence & Data Science — CGPA: 8.50

Swamy Vivekanandha Vidyalaya Higher Secondary School, Salem, Tamil Nadu

HSC, 2023 — 75.8%

Golden Rays Matriculation School, Salem, Tamil Nadu

SSLC, 2021 — All Pass

CERTIFICATIONS

- Machine Learning Internship / Certification — CodeAlpha

LANGUAGES

English • Tamil • Telugu
